

Historical Mapping

SAMPLES

Historic Ordnance Survey mapping is scanned in at over 500 dots per inch (dpi), setting a new industry standard. This sharper imagery means the information supplied on the old maps is clearer enabling greater confidence in your opinion.

Key Features

Old maps date back to the 1840s to provide detailed insight into historical land use to understand the potential contaminated land risks and associated liabilities.

We also include detail from the original marginalia information such as surveyed, leveled and copyright dates.

This additional inspection ensures you have everything you need to provide an accurate and informed opinion. Choose from three old map formats which can include both National Grid and County Series maps:

What is the coverage on the A3 Maps?

Full pack, including town plans: Available scales include 1:10,000, 1:10,560, 1:2,500, 1:1,250, 1:1056 and 1:500
